

Is the Battery Directive fit for the coming era of batteries?

The use of batteries will take on such proportions that by 2030 the need for batteries will be 14 times greater than today. A modernisation of the current Battery directive with appropriate measures throughout the entire life cycle of batteries was thus needed to make it fit for the coming era of batteries.

What information is available in the batteries directive 2006/66/EC?

Article 15) of the Batteries Directive 2006/66/EC provides access to detailed information on batteries and accumulators produced and waste generated. For questions about EU environmental policy, please contact the Commission. The Commission is repealing in 2025 the ...

What does the new batteries regulation mean for the environment?

To minimise the environmental impacts of this growth and considering changes in society, new technological developments, markets and the uses of batteries, the European Commission proposed a new Batteries Regulation in 2020. The Regulation entered into force on 17 August 2023 and repeals the Batteries Directive (Directive 2006/66/EC).

What are EU rules on batteries?

EU rules on batteries aim to make batteries sustainable throughout their entire life cycle - from the sourcing of materials to their collection, recycling and repurposing.

How can South Sudan's energy sector support peacebuilding?

One possibility for South Sudan's electricity sector is to work with the energy transition objectives of the United Nations (UN) Secretariat, which present new and unique opportunities to unlock a series of clean energy projects across the country. This approach is also a creative way to support peacebuilding.

Why is South Sudan a low-electrified country?

South Sudan is the least electrified country in the world; according to the World Bank, only 7.2 percent of the population has access to electricity. The recent civil war destroyed most of the existing limited electricity infrastructure, including the few projects that had been developed in the immediate pre- and post-independence periods.
