

The Ministry of Housing and Urban-Rural Development issued a document on laying solar photovoltaic panels

What does the Ministry of Housing & Urban-Rural Development do?

The Ministry of Housing and Urban-Rural Development of the People's Republic of China was established in 2008 as a ministry under the State Council responsible for the administration of construction projects in China. The main responsibilities of the ministry are: To guide the planning and construction of rural and urban areas in China;

What is the policy related to solar energy development?

The only policy related to solar energy development is the supply-side R&D policy to promote and follow the development of solar technology. For the demand-side, Solar PV was planned by the government as the solution for non-electricity remote areas.

What is China's PV solar policy?

China is a quick policy learner that can follow the international policy experience and import them to China. However, Chinese PV solar policy is lack of strategic policy research. For example, the policies that had been launched were mostly made without the guidance of national energy portfolio strategy.

Does China's solar policy influence the development of the solar industry?

However, based on the limited studies on China's solar PV policies, the literature only lists China's existing PV solar policies „which cannot explain the dynamic trajectory of Chinese solar policy and its relation to the development of the industry.

What are the demand-side policy practices related to solar energy?

The demand-side policy practices related to solar energy in different countries cover a very rich range of policy instruments, including feed-in-tariffs, subsidies, net metering, green tags, renewable energy portfolios, financial support, public investment, tax credits, government mandates and regulatory provision , .

When did solar PV become a technology priority?

In 2006, the State Council issued the Outline for National Middle and Long Term Scientific and Technological Development Plan (2006-2020), taking high cost performance solar PV cells and their application technologies as one of the technology key priorities.
