

What does a green dot on a battery mean?

Typically, a light green dot indicates a fully charged battery. The electrolyte solution is close to 1.265, heavier than water (1.0). Maintenance-free batteries have relief valves that prevent pressure buildup. Manufacturers refer to them as VRLA or valve-regulated lead-acid batteries.

What does a green eye on a car battery mean?

The green eye of a car's battery is not a hydrometer, as many people assume. It merely indicates the level of the electrolyte. It works by the principle of light refraction. A dark eye indicates a low level of electrolyte. This gimmick might be useful for batteries in which you can add electrolyte.

What does a green/black indicator on a battery mean?

Manufacturers refer to them as VRLA or valve-regulated lead-acid batteries. A dark green/black indicator on a maintenance-free battery typically indicates that the battery needs a charge. The electrolyte has undergone a chemical reaction and is now closer to water. Charging a battery with a dark indicator restores the solution's specific gravity.

What does a green dot mean?

Every green dot represents a city or town. Tap on it to tune into the radio stations broadcasting from that city. By adding new radio stations every day and updating ones that no longer work, we hope to give you a smooth international radio listening experience. Don't worry: the radio will keep playing, even if your phone goes to sleep.

What does the yellow dot mean on an iPhone?

On an iPhone, the yellow dot indicates that the camera is ready to perform when you open the camera application. This feature is also present in other platforms like Snapchat, Instagram, and TikTok, where you can take pictures directly on the applications rather than going through the step of opening the camera.

What does a green dot mean in the Messenger app?

The green dot in the Messenger app indicates that the person is online. It shows that they are currently available to chat or receive messages.
