

# What is the largest battery system for RVs

What is an RV battery?

The RVgeeks >> Gear, Mods & Upgrades >> Electrical >> RV Battery Guide: House, Chassis, Lithium & More This post may contain affiliate links. Batteries are a critical part of any RV. Your RV battery gives you the power you need to operate a variety of features, including appliances, devices, and lights.

What is the best RV battery?

We feel that's a small price to pay for a battery of this caliber. So if you don't mind the high-cost upfront, a lithium battery is the best RV battery you can buy in terms of performance and efficiency. When shopping for the best RV batteries, it's important to look at the size of the battery.

What is the difference between RV chassis batteries and RV House batteries?

Let's briefly look at the difference between RV chassis batteries and RV house batteries. The chassis battery is your starting battery. A chassis battery is a starting battery whose main job it is to start the engine of a motorized RV. It sits in your engine compartment and starts your RV's engine.

How many house batteries does an RV have?

Most RVs have at least one house battery. Many rigs have an entire bank of them. These batteries power interior lights, water pump, vent fans, and other devices inside your RV. This RV is boondocking (not connected to shore power). It's the rig's house batteries powering the interior lights.

Are there different types of RV batteries?

If you have a driveable RV, (Class A, B, or C RVs are all motorized), then there are two different types of batteries in your rig. You'll have a "chassis" (or "start/starting") battery and a "house" battery (or batteries). If you have a travel trailer or 5th wheel (an RV with no engine, that you tow), then you'll only have a house battery bank.

What is a good battery capacity for an RV?

Focus on batteries with a higher amp-hour (Ah) rating. For most RV adventures, a capacity ranging between 100-200 Ah should suffice. Less than 100 Ah and you're looking at a lifestyle of charging gadgets and not much else. More than 200 Ah, and not even the icy tundras of Canada will be able to stop your off-grid expeditions!
