

What to do if solar energy cannot be checked

What should I do if my solar panels don't work?

Checking for shade on your panels - trees and shrubs that grow and block the sun from your panels will affect the amount of electricity they produce. So it's good practice to prune them back. Keeping an eye out for birds or squirrels nesting under your panels. They can cause damage, as well as soiling your panels.

What should I do if I don't have solar system monitoring?

If you do not have solar system monitoring installed, the first step is to check for any obvious issues with the solar panels, such as a build-up of dirt, dust, mould, or leaves. Maybe a good wash with a soft broom and water is all that they need. Also, check no nearby trees have grown significantly and are shading the panels.

How do I care for my solar panels?

Here's how to proactively care for your solar panels and safeguard your clean energy investment: Depending on your location, dust, pollen, or leaves might accumulate on your panels. A seasonal, gentle rinse can help maintain their efficiency. Think of it as giving your panels a refreshing shower.

How do I know if my solar panels are bad?

Check the wiring and connectors that join the solar panels, inverters, and electrical system. Faulty wiring often contributes to problems with solar panel connections. The most frequent issue is a poor connection between the wires and the terminals on the inverter or the solar panels. Corrosion or damage could be responsible for this.

What should I do if my solar meter is faulty?

Contact your solar panel installer or a solar panel maintenance professional. If your generation meter is replaced, make sure you get a letter from the installer stating what they have done and that they changed the meter because it was faulty. The paperwork should also state the model and serial numbers of the old and new meters.

How do I know if my solar panels need a clean?

Take a gentle stroll outside and see if your panels look dirtier than your car windshield; if yes, they might need a clean. Observe if any new buildings, trees, or even a basketball hoop have grown or been constructed that might be blocking sunlight to your panels.
