

Can you use adhesive on solar panels?

I strongly urge you to avoid using any adhesive for solar panels. Keep in mind that flexible solar panels don't last long. You will probably need to replace them every couple of years. That will be a challenge with them glued in place. For rigid panels, the best adhesive would be M6 bolts.

What do I need for a flexible solar panel?

You're going to need the flexible solar panels—refer to our top picks on our ["/flexible-solar-panels"](#) page. You'll also need a high-quality adhesive, a measuring tape, a clean cloth, and your personal protective equipment (PPE), such as gloves and goggles. Make sure your work surface is flat and stable.

How much adhesive do I need for a solar panel bracket?

If you're using adhesive you want as much surface area connection between the bracket and the roof. A couple inches of bracket may not be enough. Using adhesive under Unistrut that matches the full length of the solar panels is much better. But I'm a lot more comfortable with actual fasteners.

What do I need to install a solar panel?

The list is pretty straightforward, really. You're going to need the flexible solar panels—refer to our top picks on our ["/flexible-solar-panels"](#) page. You'll also need a high-quality adhesive, a measuring tape, a clean cloth, and your personal protective equipment (PPE), such as gloves and goggles.

How do I insulate my solar panels?

Polycarbonate insulation is an excellent way to insulate so you can further protect your solar panels as well as keep your roof from becoming damaged. It can be a little tricky to figure out how to install this, but there are tutorials. If you are uncertain about any steps, get assistance from an expert in solar installation.

How to install a flexible solar panel?

Apply a generous and even layer of adhesive on the back of the flexible solar panel. Make sure you cover everything, from corner to corner. Carefully align your panel with the marked positions on your mounting surface. Precision at this stage will make the difference between a professional-looking job and a clumsy DIY project.
