As the earliest expert to enter this industry, TYCORUN has developed a complete set of profitable battery swap system with years of technology precipitation and successful operating experience.

Is battery swapping a reality in China?

In China, however, battery swapping has been a reality for a couple of years. How did Chinese companies like Nio make it work with 2,300 swapping stations nationwide? What can companies outside China learn from the Chinese experience? Range anxiety has been one of the most significant barriers for electric vehicle (EV) adoption among consumers.

Could battery swapping solve a key barrier to EV adoption?

Summary. Battery swapping is a technology that could solve one key barrier for EV adoption: consumers' range anxiety and the long waiting time for battery charging. Wouldn't you feel more assured on a weekend trip if you knew you could stop at a swap station and replace depleted battery packs with fully charged ones in five minutes?
