

Which battery is best for a car?

Absorbent Glass Mat (AGM) batteries are the most advanced batteries you'll find in a car right now, unless you're driving a plug-in hybrid or a fully electric vehicle. AGM batteries are also suitable for cars with start-stop systems, but they offer the potential for many more starts than an EFB battery and will have a longer service life.

What is the Best Lead acid car battery?

If you're going with standard chemistry and design, the DieHard Platinum series is the best car lead acid car battery. It uses a "Stamped Grid" design technology that essentially makes the positive and negative grid more durable and stronger than less expensive methods. Regardless of what you call it, it works.
