

Xinjiang's new energy push is part of the country's accelerating shift from fossil fuels to clean energy. Official data showed that China's installed capacity of renewable energy ...

Solar power capacity surged 48 percent to about 790 million kilowatts, while wind power capacity rose 20.3 percent to about 490 million kilowatts. From January to ...

Benefiting from a complete life-cycle supply chain and rapid advancements in PV power generation technology, China has emerged as a leader, achieving significant cost reductions and shaping the ...

Benefiting from a complete life-cycle supply chain and rapid advancements in PV power generation technology, China has emerged as a leader, achieving significant cost ...

As solar energy power generation is scaling up, ecological benefits are reaped as well. Apart from solar energy, Gulang County has launched wind power projects in its ...

Xinhua Headlines: Solar power farms on plateau fuel China's green energy revolution- ... Today, covering an area of 609 square kilometers, this solar power base boasts ...

The project includes 100 MW of tower CSP (concentrated solar power) using molten salt as the thermal storage fluid, with 8 hours of storage (enough to supply 800 MWh ...

Official data released this week showed that the installed capacity of solar power came in at approximately 750 million kilowatts in the first eight months of 2024, rocketing 48.8 ...

BEIJING, Sept. 27 (Xinhua) -- Over the past three months, Anhui Huasun Energy Co., Ltd. has ...

The project includes 100 MW of tower CSP (concentrated solar power) using molten salt as the thermal storage fluid, with 8 hours of storage (enough to supply 800 MWh daily of long duration storage) together with 900 ...

After entering into full operation, annual online power generation will reach 2.04 billion kWh, about 620,000 tons of standard coal can be saved annually, reducing of carbon ...

Designed by the Northwest Electric Power Design Institute, the Hami Solar Thermal Power Plant is among China's first generation of solar thermal power demonstration ...

Updated: October 28, 2023 19:45 Xinhua. BEIJING, Oct. 28 -- China's installed solar and wind power

capacity saw robust growth this year amid the country's green development push, ...

This aerial photo taken on Dec. 22, 2023 shows a wind farm in Tangshan City, north China's Hebei Province. (Xinhua/Yang Shiyao) BEIJING, Dec. 26 (Xinhua) -- In the first half of this ...

BEIJING, Sept. 27 (Xinhua) -- Over the past three months, Anhui Huasun Energy Co., Ltd. has been racing against time to make solar modules for a gigantic photovoltaic project in China's ...

BEIJING, Aug. 15 (Xinhua) -- China's power generation surged at a rapid pace in July, the National Bureau of Statistics said Thursday. ... In July, hydropower output surged 36.2 percent ...

XINING, June 9 (Xinhua) -- Amid China's green energy revolution, the world's largest solar photovoltaic power plant on the Qinghai-Xizang Plateau is forging a unique development path, ...

XINING, June 9 (Xinhua) -- Amid China's green energy revolution, the world's largest solar photovoltaic power plant on the Qinghai-Xizang Plateau is forging a unique development path, simultaneously generating electricity while making ...

During the 14th Five-Year Plan period, Xinhua Power Generation Company will invest in the construction of a number of clean energy projects such as integrated solar thermal storage, pumped storage, guaranteed photovoltaics, and ...

LANZHOU, July 19 (Xinhua) -- In Guazhou County of northwest China's Gansu Province, a ...
